

## **PIAAC**

The Program for the International Assessment of Adult Competencies (PIAAC) is a cyclical, large-scale study of adult skills and life experiences focusing on education and employment. Survey participants are asked questions about their educational background, work history, the skills they use on the job and at home, their civic engagement, and sense of their health and well-being. In addition, participants complete an assessment that is designed to compare a broad range of adult skills, from simple reading to complex problem-solving skills.

Westat is seeking enthusiastic, self-motivated, detail-oriented individuals to work on PIAAC. Interviewers contact preselected households, gain their confidence and cooperation, and conduct interviews and administer a skills exercise using a Westat issued tablet.
