

CAV

We are currently seeking Medical Data Validators with a commitment to excellence, to abstract and validate medical record data for a Government-sponsored study. The primary role of the medical data validator is to travel to assigned medical facilities, abstract data from paper or electronic medical records, compare abstracted data with reported data, resolve discrepancies with medical staff, and return results to Westat. The validators will travel nationwide in teams to various facilities during weekdays and return home on most weekends.

Any offer of employment will be contingent upon receipt of acceptable results from a background screening based on the specific position, which will include, at a minimum, criminal records history.

This is a temporary full-time, non-exempt position with limited benefits. This position is expected to last approximately 8 weeks from mid-April through mid-June 2020. Pay rates are based on level of experience.

Please explore our Medical Data Validator positions by clicking the “Apply Now” button on the main page of this site and searching for our positions using the keyword CAV.
